

What is claimed is:

- 1 1. An electronic device, comprising:
2 a body;
3 a display unit disposed on the body; and
4 an index unit having a first index port and a second
5 index port, moving between a first mode to
6 expose the first index port and a second mode
7 to expose the second index port.
- 1 2. The electronic device as claimed in claim 1,
2 wherein the index unit is electronically connected to the
3 display unit.
- 1 3. The electronic device as claimed in claim 1,
2 wherein the first index port or second index port is
3 electronically connected to the display unit.
- 1 4. The electronic device as claimed in claim 1,
2 wherein the body comprises a seat for receiving the index
3 unit.
- 1 5. The electronic device as claimed in claim 1,
2 wherein the body comprises a first panel and a second
3 panel, and the display unit is disposed on the first
4 panel and the second panel.
- 1 6. The electronic device as claimed in claim 1,
2 wherein the display unit is a liquid crystal display.
- 1 7 An electronic device, comprising:
2 a first element;

3 a second element coupled to the first element with
4 at least one degree of freedom; and
5 an index unit coupled to the first element with at
6 least two degree of freedom.

1 8. The electronic device as claimed in claim 7
2 further comprising a display unit disposed on the second
3 element.

1 9. The electronic device as claimed in claim 8,
2 wherein an index unit has a first index port and a second
3 index port, and the first index port or second index port
4 is electronically connected to the display unit.

1 10. The electronic device as claimed in claim 8,
2 wherein the display unit is a liquid crystal display.

1 11. The electronic device as claimed in claim 7,
2 wherein the index unit has a first index port and a
3 second index port, and the first index port or second
4 index port is electronically connected to the display
5 unit..

1 12. The electronic device as claimed in claim 7,
2 wherein the first element comprises a seat for receiving
3 the index unit.

1 13. The electronic device as claimed in claim 7,
2 wherein the second element comprises a first panel and a
3 second panel, on which the display unit is disposed.

1 14. An electronic device, comprising:
2 a first element;

3 a second element coupled to the first element along
4 a first axis;
5 a display unit disposed on the second element;
6 an intermediate element disposed on the first
7 element along a second axis; and
8 an index unit disposed on the intermediate element.

1 15. The electronic device as claimed in claim 14,
2 wherein the index unit is coupled to the intermediate
3 element along a third axis.

1 16. The electronic device as claimed in claim 15,
2 wherein the third axis is substantially perpendicular to
3 the second axis.

1 17. The electronic device as claimed in claim 14,
2 wherein an index unit has a first index port and a second
3 index port, and the first index port or second index port
4 is electronically connected to the display unit.

1 18. The electronic device as claimed in claim 14,
2 wherein the first element comprises a seat for receiving
3 the index unit.

1 19. The electronic device as claimed in claim 14,
2 wherein the second element comprises a first panel and a
3 second panel, on which the display unit is disposed.

1 20. The electronic device as claimed in claim 14,
2 wherein the display unit is a liquid crystal display.
